Az eXtrem-power nevet a magyarországi forgalmazó saját márkanevként hozta létre és használ a gyártó engedélyével. A tuning doboz kiváló minőségű, mikrokontroller által vezérelt. EU.-ban fejlesztik és gyártják. A táblázatban szereplő adatok valós adatok, melyek a gyártó saját mérési eredményei. Ezen adatoktól eltérő mérési eredmény is születhet, mivel a leadott teljesítményt több tényező is befolyásolja! Beszerelése különösebb szaktudást nem igényel. A tuning doboz egy nyomógomb segítségével kilenc fokozatban állítható a felhasználó számára legmegfelelőbb teljesítményre. A kiválasztott teljesítmény fokozat egy LED kijelzőn, üzem közben folyamatosan látható. Megrendelése egyszerű, mivel elég a kívánt cikkszámot és a darabszámot megadnia! A szett tartalmaz minden alkatrészt, ami a tuningoláshoz szükséges: egy db Y kábelt melyet csatlakozókkal sorba kell kötnia a rail cső nyomásmérőjével és csatlakoztatni a tuning dobozhoz, egy db tuning dobozt, egy db beszerelési és beállítási útmutatót. Eredményes tuningolást kíván: FOD-CAR BT.
